Table of Contents

<u>Preface</u>	3
1. ORACLE Client Utilities (ORAU1).....	4

Preface

The following conventions are used in this document:

~~**Bold**~~ ~~Used for information that is typed, pressed,~~
or selected in executables and
instruction. For example, select connect to
host.

Italics Used for file names, directories, scripts,
commands, user IDs, document names, and Bibliography
references; and any unusual computerese the first time it
is used in text.

Underline Used for emphasis.

Arrows <> Used to identify keys on the keyboard. For
example <Return>.

“Quotation Marks” Used to identify informal, computer-
generated queries and reports, or coined names; and to
clarify a term when it appears for the first time.

Courier Font Used to denote anything as it appears on the
screen or command lines. For example
User:/ora01/dba/oradb:/bin/csh.

Capitalization Used to identify keys, screen icons, screen
buttons, field, and menu names.

The purpose of this document is to identify and describe the hardware, software, and documentation baseline of the application, to include a list of known problems.

1. ORACLE Client Utilities (ORAU1)

A. Hardware: Hewlett Packard (HP-UX/Version 10.20)

A. Software: ORACLE Import -- 7.3.2.3
ORACLE Export -- 7.3.2.3
SQL*Loader -- 7.3.2.3

A. Documentation Baseline of the application: N/A

A. Known Problems: None

E. Waivers Granted: The following waivers have been granted by DII COE Engineering:

(1). It is permissible to place a non-standard file structure (ora01, ora02, and ora03 subdirectories) underneath the / (root) directory instead of underneath the Oracle COTS directory. These subdirectories can be created using an XTERM session.

(2). It is permissible for the three non-standard file subdirectories (ORA1, ORA2, and ORA3) to not be deinstalled during the deinstallation of the Oracle application.

(3). Three ports will need to be registered with CM 1525, 1526, and 1527. The developer will register these ports.

(4). One account group is required: 00PER. The developer must register the 00PER account with CM

(5). Two accounts are required by Oracle. The first will be a system account used by the application and it will not have a UNIX password. The other is a UNIX

(6). The following six documents are required: Version Description Document (VDD), Software Test Plan (STP), Software Test Description (STD), System Test Report waived.

(7). A test account group is required in order to perform the T&E function. The developer may either

generate a new group or use the sysadmin group.

(8). The segment may be delivered in an un-compressed
format.
